

MANAGED SERVICES FOR THE ATTIVIO PLATFORM

Accelerate time to value and offload internal infrastructure requirements

The Attivio Cognitive Search and Insight Platform delivers a contextualized search and discovery experience by combining self-learning technologies such as indexing, natural language processing, and machine-learning.

To adapt to enterprise requirements, Attivio offers flexible deployment options that range from customer-managed to Attivio-managed. This includes: on premise; in your public, private, or hybrid cloud; and a fully managed offering.

The Attivio Managed Services offering allows you to get started quickly, avoid the overhead of provisioning servers and IT resources, and ensure application scaling for the long term.

Attivio Managed Services includes:

- **The Attivio Cognitive Search and Insight Platform, hosted in the cloud**
- **Complete system set up, including**
 - Configuration of connectors to index content and data with integrated security
 - Configuration of Single Sign On (SSO)
- **Fully automated relevancy tuning, with the option for self-service management of relevancy and user profiles**
- **Fully managed administration and operations:**
 - System monitoring with a Service Level Agreement (SLA) for uptime, performance and intrusion detection with proactive alerting and remediation,
 - Application monitoring and management of content flow
- **Separate availability zone for disaster recovery**

With the Attivio Managed Services offering, you have the best of both worlds: all the benefits of the Attivio Platform, and the convenience and resource savings of a hosted, managed application.

The Attivio Difference

Attivio's foundational technology powers four unique differentiators.

INFORMATION INTELLIGENCE

Reveal relationships and insights across structured and unstructured silos through contextual enrichment and semantic understanding

USER EMPOWERMENT

Anticipate individual information needs and boost productivity by enabling people to find critical information at the point of need

SECURE ENTERPRISE PLATFORM

Adapt to the most complex data and IT ecosystems, while enforcing rigorous security policies at global scale

PROVEN EXECUTION

Turn data and content into strategic advantage on the most complete and proven cognitive platform
